

CORE MORINGA™ PREMIUM TEA

Zija's Premium Tea is a delicious blend of traditional Eastern and Western herbs that aids in digestion, acts as a natural laxative and diuretic, and eliminates toxins released from fat cells during weight loss. It's the perfect way to calm and cleanse your body.

The byproducts or waste that our body produces are the results of all metabolic processes that occur. Burning fat is one of the most metabolically active processes that occurs in the human body. This is because fat is highly concentrated energy that has been consumed but not yet burned.

In terms of energy, 10 pounds of fat is equivalent to about 68 pounds of sugar. This means that when we consume too many calories, our body will convert and concentrate the excess protein, sugar and fat into triglycerides and store it as fat in our adipose cells.

When our body needs extra energy, it will access its own fat. This occurs when triglycerides are converted into glucose and released into the bloodstream, resulting in an excess amount of waste. When too much waste is built up in the body, it will limit the access of fat for energy to prevent our body from poisoning itself. Stated simply, it is important that we regularly detoxify our body to remove this excess waste.

In addition to allowing our body to freely utilize fat stores as energy, detoxifying with Zija's Premium Tea also allows us to better absorb nutrients from food. This is imperative because different nutrients are absorbed in different areas throughout our digestive system. Rather than degrading nutrients before they reach the area where they are best absorbed, nutrients are optimized for maximum engagement.
